

Enterprise **Agentic AI** for SAP

Transform SAP Data into Business Decisions

A conversational AI layer that turns complex SAP data into instant insights and KPI.

Built for

SAP ECC 6.0 | SAP S/4HANA | SAP HANA | SAP BW | SAP Datasphere

The Challenges Business Leaders Face

Every day, business leaders make critical decisions that impact revenue, profitability, inventory, production, and customer satisfaction.

However, key business information is often scattered across SAP transactions, reports, spreadsheets, and dashboards. Finding the right insights can take hours, delaying decisions and reducing business agility.

How SAP Connect Empowers Business Leaders

SAP Connect transforms SAP data into instant, actionable business intelligence through a simple conversational experience.

Instead of navigating multiple SAP transactions, reports, and dashboards, business leaders can simply ask questions and receive immediate answers, insights, and recommendations.

Key Benefits

-  Get real-time visibility into business performance
-  Make informed decisions with confidence and speed
-  All Your Business Information at Your Fingertips
-  Monitor sales, inventory, operations, and customer trends from a single interface
-  Receive AI-generated executive summaries and business insights
-  Compare actual performance against targets and identify business exceptions
-  Identify risks, opportunities, and operational bottlenecks faster

From Information to Insight

From Insight to Action

From Action to Business Results

Meet SAP Connect

Your Intelligent SAP Engagement Layer

Instead of navigating transactions, reports, and dashboards, users simply chat with SAP Connect.

— Example Questions —

Show weekly revenue for the last 12 weeks?

What inventory will stock out next week?

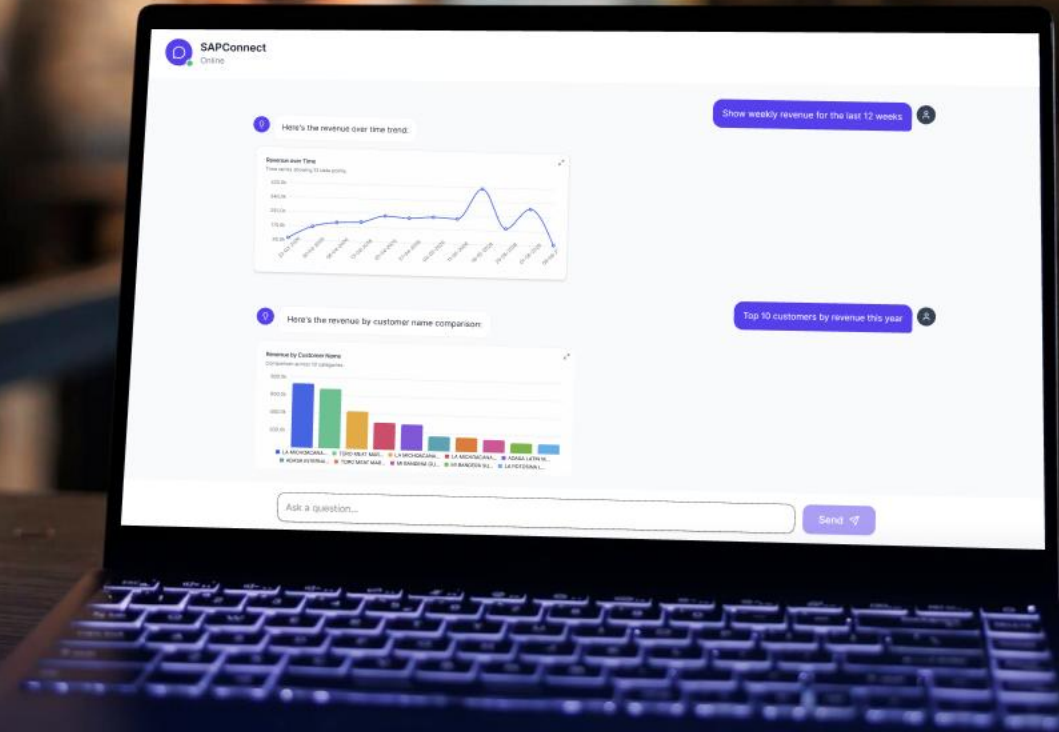

Top 10 customers by revenue this year?

Which suppliers are causing production delays?
